Kam, 9 Jul 2020 jam 17.11

Dear author,

Please take a final proofreading on the formatted paper **carefully**, especially the authors' info, figures and tables.

Best regards,

Meng Dan

Dear Xin,

Many thanks for your kind help to revise the draft of the article following the instruction to the author. I have done what you suggest for the revision. Also, I have uploaded the file to the system. But I am still not so sure, that why in the attachment I send you also the file.

With best wishes,

Adi Jaya

Dear Prof. Wang Yingkuan, PhD

Editor of International Journal of Agricultural and Biological Engineering (IJABE)

We are very pleased to be able to submit a revised paper for International Journal of Agricultural and Biological Engineering (IJABE) with title "**Study of The Use of Zero Burning Waste on The Quality of Liquid Fertilizer and Vermicompost**" with the authors Adi Jaya, Bambang S. Lutt, Emmy Uthanya Antang, Sosilawaty, Panji Surawijaya and Salundik Dohong. This paper is a research article as a result of field research on the combination effects of type of worm and type of feed on the quality of vermicompost. The result of this research is important as a tool to take a policy on development of sustainable agriculture and more research is need to apply the reduce of biomass burning in peatland area. I believe that this manuscript is fit to one of focus in this journal. I can state that this manuscript is original and is the result of our research and has never been published before. Of course we hope that this paper can

be accepted for publication in this journal, and if according to the editors and reviewers it still does not meet the requirements, please let us know.

Looking forward to hearing from you soon.

Thank you in advance,

Adi Jaya

Adi JAYA:

We have reached a decision regarding your submission to International Journal of Agricultural and Biological Engineering, "Study of The Use of Zero Burning Land Preparation Waste on the Quality of Liquid Fertilizer and Vermicompost".

Our decision is to: revise according to the following review suggestion:

Very interesting study. However, the manuscript could be improved addressing the following comments.

1. No graphs in the entire paper. It would be great if the authors could present some of the tables using graphs. Its easier to read a plot instead of the numbers.

2. The English need to be proofread.
